

AVID

VIDEORAID ST AND SR

Local storage solutions

"I have never used a drive that was so small and so fast. Now, I am able to work with five times the amount of HD footage with a smaller drive, for a fraction of the cost."

JEB JOHENNING

Ocean Video | Beverly Hills, CA

HIGH PERFORMANCE LOCAL STORAGE SOLUTIONS.

Cutting edge SAS (Serial Attached SCSI) technology delivers plug and play installation and multi-lane performance—up to 1.2 GB/sec.

Parity RAID 5 (Redundant Array of Inexpensive Disks) protects your media from drive failure. Capacities range from 2.5TB to 16TB per editing system.

Avid VideoRAID ST and SR provide robust bandwidth for real-time playback of uncompressed HD media, even during drive failure rebuild mode.

A WORLD-CLASS COMPANY. A WORLDWIDE COMMUNITY.

Choose Avid and you'll join a vibrant community. Training and support tailored to your needs and budget gets you started, and keeps you going. Online and real-world user forums, events and communities provide feedback, news, and peer-to-peer support.

QUALITY, PERFORMANCE AND VALUE. COUNT ON VIDEORAID.

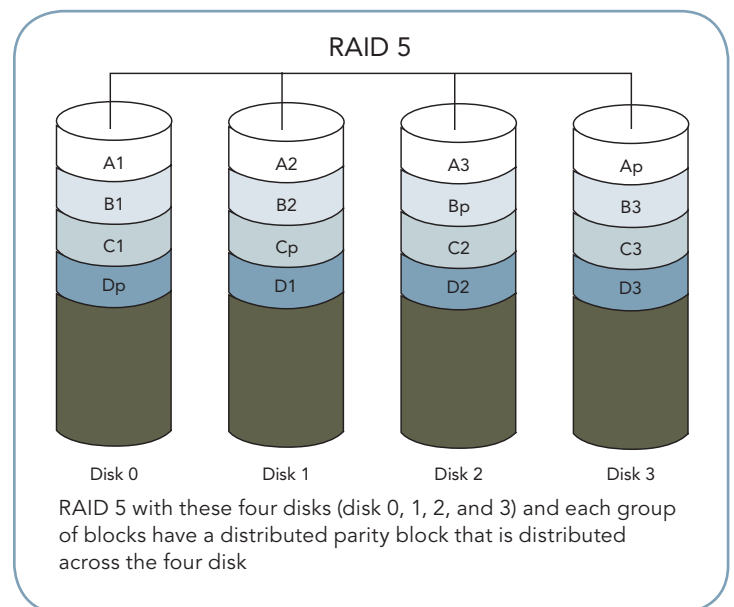

Footage and metadata are the critical building blocks behind every project. Avid® VideoRAID® storage solutions protect your most valuable assets, provide highly-efficient access to every frame, accelerate your workflow, and instill confidence – in every session, for every client. Avid's family of media storage products offer a full range of solutions designed to meet your most demanding needs.

UNMATCHED TESTING. UNMATCHED RELIABILITY.

Every Avid storage system is rigorously tested to meet strict design, inspection, and qualifications criteria. The result? Unmatched real-time playback and collaboration capabilities and a guaranteed level of performance within an Avid environment.

FORM, FUNCTION & PIECE OF MIND.

A wide range of capacity options and form factors, plus a best-in-the-business warranty program, make Avid storage solutions the value-driven choice for editors around the world.

QUALITY, PERFORMANCE AND VALUE – Storage solutions for real world workflows.
