High Definition slow motion and instant replay is no longer out of reach with NewTek 3PLAY™. Now, sports broadcasters, teams, leagues, schools and organizations have an affordable alternative for multi-channel HD/SD slow motion and instant replay. The small size and portability of 3PLAY enhance production at any venue. The ability to connect to any switcher provides the ultimate flexibility for all production environments. NewTek 3PLAY is the perfect instant replay, slow motion solution for live production.

3PLAY™

✔ Capture all the action with synchronized, continuous recording and display of up to three video streams.

✔ Deliver slow motion instant replays as soon as recording begins without interrupting capture.

✔ Organize replays in separate lists using color coding to easily distinguish teams, players, game periods, event types, highlights and more.

✔ Play back key elements at variable speeds from multiple camera angles to give the viewer a comprehensive look at all the action.

✔ Quickly export highlight reels of selected video segments including an edit decision list for rapid turn-around.

✔ Replay pristine HD footage in 1080i or 720p as well as component, Y/C and composite SD in 4:3 or 16:9.

✔ Multi-standard version supports both NTSC and PAL.

✔ Choose from two output modes. 1-Out mode allows the 3PLAY operator to send a switched replay from multiple camera angles to the switcher. 3-Out mode allows the operator to control the playback speed while the switcher is fed all three outputs allowing the director to choose the camera angle.

✔ ISO recording provides the ability to edit the event in post for maximum flexibility and functionality.

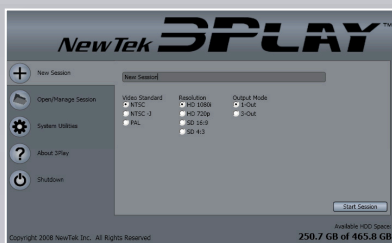

✔ Replace three HD decks at a fraction of the cost.

3PLAY Suggested Retail Price:

US\$ 21,995 NTSC

US\$ 24,995 Multi-Standard

3PLAY is slated to ship in Q1 2009.

3PLAY gives sports broadcasters, leagues, teams and schools an affordable option to deliver instant replay and slow motion for broadcast, webcast, arena scoreboard displays and more.
